General Maintenance

PLASTIC (HDPE) MAINTENANCE

General Cleaning
For general cleaning, lightly scrub the boards with a plastic bristled brush and any of the following products:
• Grease Lightning
• CLR
• Simple Green
• Crust Buster Lime and Scale Remover
• Wet & Forget

Fine Cleaning
For fine surface marks, scrub the boards with a mixture of water and TSP (Trisodium Phosphate) which can be found at Home Depot.

Tough Cleaning
For tougher stains including rust spots, scrub the boards with Iron Out which can be found at Home Depot.

White Plastic Cleaning
Mr. Clean Magic Eraser works well for cleaning white material.

Power Washing
Power Wash boards at a minimum of 12" away with 1500 PSI.

CARE OF RESIN

Depending on where the product is placed determines the frequency it will need to be cleaned. Any foreign substance should be removed from the resin as soon as possible. Avoid areas that will allow the resin to come in contact with fertilizer, salt, tree sap, soda, or other chemicals.

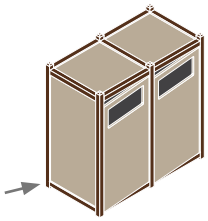
Clean the Resin
To clean the resin, we recommend using warm water and mild dish soap. For harder stains, you may need to soak the resin with warm water and mild dish soap solution and scrub it with a lint-free cloth. You can also use a mild cleaning solution like "Simple Green" to clean the resin.

Protect the Resin
To give the resin an added shine and protection you can apply ArmorAll over a clean resin surface. You can also use ArmorAll to rejuvenate your plastic products after cleaning.

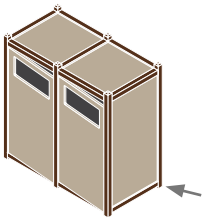
SQUARING

We stand behind our products and value your continued business. Please follow these tips to ensure the longevity of your bins.

1. Place your bin(s) on a hard, flat surface. Observe any rocking.
2. Using your wrench, turn feet to lengthen them (clockwise with bin upright).
3. Test bin for rocking and test as necessary.



A. IF DOOR HANGS TO THE LEFT
Turn foot height under the back left corner post of the product. This will help correct the product and the door.



B. IF DOOR HANGS TO THE RIGHT
Turn foot height under the back right corner post of the product. This will help correct the product and the door.

IPE STAINING

VIDEO
How To Stain Your Ipe Product

Click here to see a brief video of our recommended steps in action.

New furnishings with Ipe will appear smooth and "polished" regardless of staining—this comes from the oil that occurs naturally within the wood. As the oil on the surface evaporates over time, the silver patina begins to emerge. If you wish to maintain the original appearance of your Ipe furnishings, we recommend applying stain 1-2 times annually (4-5 times in harsher environments).

Periodic cleaning of your Ipe Hardwood furnishings is recommended to help maintain appearance and prevent build-up of hard water, dirt and grass. A wide variety of Ipe cleaners can be sourced from your local hardware store or paint supply dealer. It is not essential, but furnishings may be covered when not in use for long periods of time. If you choose to use protective covers we recommend only using "breathable" covers that will not trap humidity, but allow ventilation.

WARRANTY

Supplier offers a limited warranty on all of Supplier's products for one year from date of shipment to be free from defects in workmanship and/or material(s). Supplier makes no warranty with respect to either the merchantability of Supplier's products, or their suitability for any specific purpose or use (see Limitation of Liability). Any action by Customer to enforce the terms of this warranty must be brought within one (1) year of the date of Supplier's shipment of the product to Customer.

This warranty is limited as stated, and under no circumstances shall Supplier or its assigns be considered liable for any direct or indirect damages caused by or resulting from the use of and/or handling of any items sold by Supplier.
If products do not meet the above warranty, Customer shall promptly notify Supplier in writing of the specific defect in the product prior to expiration of the warranty period. Supplier shall, at its option, repair or replace defective products. Warranty repair or replacement shall not extend or renew the applicable warranty period. The warranty and remedies described are conditioned upon Customer's proper storage, installation, use, operation, and maintenance of products. Any modifications or repairs of products, other than by Supplier, must be authorized by Supplier in writing. Customer's failure to meet any such conditions renders the warranty null and void. Supplier is not responsible for normal wear and tear.
