LEVEL TOWEL BUGGY ENCLOSURE

Thank you for purchasing Keystone towel buggy enclosure.
Before assembly takes place, be sure that all necessary tools & hardware have been collected and identified.

INSTRUCTIONS

1. Remove everything from your unit. Place the unit in your desired location. Depending on the surface, a slight shift in location can cause a change leveling.

2. Open the doors and locate the leveler studs in the back corners of the bottom panel.

3. Use a slotted screwdriver to turn the stud. Turn clockwise to lift the unit up. By turning the stud counterclockwise to lower the unit. If the doors hang in this direction (see Fig 3), the back left corner is too low. Turn the back left leveler clockwise to raise the back left corner up. This will help level the product and correct the door.

4. If the doors are misaligned like this (Fig 4), the back right corner is too low. Turn the back right leveler clockwise to raise the back right corner up. This will help level the product and correct the door.

5. The levelers should be checked periodically, should the unit get moved.
