The Prestwick Companies

RESET FOR 18” ATOMIC CLOCK

INSTRUCTIONS

1. Remove battery from the clock
2. To the left and just above where the battery was, there is a black tab – press and release the tab 20 times
3. Insert fresh battery
4. Once the new battery is in, do not press any buttons
5. Hands will spin independently – they will stop at one of the following: 12:00, 4:00, 8:00 or the current Pacific Time
6. If they stop at the current Pacific time – press your appropriate time zone
7. Your clock is now reset

If the clock is still off after this process:
There is a small hole in the back of the clock with two metal prongs in it – take a small metal object (like a paper clip) and touch both prongs with the metal object at the same time – the clock will immediately set to 12:00 ------- then follow steps 1 – 6 above.
